

Trinity OPAL play policy

1. Commitment

Our school undertakes to refer to this play policy in all decisions that affect children's play. Our school is committed to providing the strategic and operational leadership needed to provide and maintain quality play provision for all of our children.

2. Rationale

Our school believes that all children need opportunities to play that allow them to explore, manipulate, experience and affect their environment. We believe play provision should be welcoming and accessible to every child, irrespective of gender, sexual orientation, economic or social circumstances, ethnic or cultural background or origin, or individual abilities.

The OPAL Primary Programme rationale is that *"... better, more active and creative playtimes can mean happier and healthier children, and having happier, healthier, more active children usually results in a more positive attitude to learning in school, with more effective classroom lessons, less staff time spent resolving unnecessary behavioural problems, fewer playtime accidents, happier staff and a healthier attitude to life."*

At Trinity our vision statement 'With love and faith, we ascend together' links with our school values where we want children to become confident learners and have aspirations and the social skills to aspire to achieve whatever they want.

3. Definition and value of play

Play is defined as a process that is intrinsically motivated, directed by the child and freely chosen by the child. Play has its own value and provides its own purpose. It may or may not involve equipment or other people.

We believe play has many benefits, including:

- Play is critical to children's health and wellbeing, and essential for their physical, emotional, social, spiritual and intellectual development.

- Play enables children to explore the physical and social environment, as well as different concepts and ideas.
- Play enhances children's self-esteem and their understanding of others through freely chosen social interactions, within peer groups, with individuals, and within groups of different ages, abilities, interests, genders, ethnicities and cultures.
- Play requires ongoing communication and negotiation skills, enabling children to develop a balance between their right to act freely and their responsibilities to others.
- Play enables children to experience a wide range of emotions and develop their ability to cope with these, including sadness and happiness, rejection and acceptance, frustration and achievement, boredom and fascination, fear and confidence.
- Play encourages self-confidence and the ability to make choices, problem solve and to be creative.
- Play maintains children's openness to learning, develops their capabilities and allows them to push the boundaries of what they can achieve.

4. Aims

In relation to play our school aims to:

- Ensure play settings provide a varied, challenging and stimulating environment.
- Allow children to take risks and use a common-sense approach to the management of these risks and their benefits.
- Provide opportunities for children to develop their relationships with each other.
- Enable children to develop respect for their surroundings and each other.
- Aid children's physical, emotional, social, spiritual and intellectual development.
- Provide a range of environments that will encourage children to explore and play imaginatively.
- Provide a range of environments that will support children's learning across the curriculum and learning about the world around them.
- Promote independence and teamwork within children.
- Build emotional and physical resilience.

5. Rights

Our school recognises the UN Convention on the Rights of the Child, which includes *the right to play, recreation and leisure* (Article 31) and the *right of children to be listened to on matters important to them* (Article 12). We acknowledge that we have a duty to take these rights seriously and listen to children's views on their play.

6. Benefit and risk

'Play is great for children's wellbeing and development. When planning and providing play opportunities, the goal is not to eliminate risk, but to weigh up the risks and benefits. No child will learn about risk if they are wrapped in cotton wool.'

Managing Risk in Play Provision: An Implementation Guide (Play Safety Forum, 2012)

The school will use the Health and Safety Executive guidance document *Children's Play and Leisure – Promoting a Balanced Approach* (September 2012) as the principal value statement informing its approach to managing risk in play. In doing so, the school will adopt a risk-benefit

approach as detailed in *Managing Risk in Play Provision: An Implementation Guide (Play Safety Forum, 2012)*.

Risk-taking is an essential feature of play provision and of all environments in which children legitimately spend time at play. Play provision aims to offer children the chance to encounter acceptable risks as part of a stimulating, challenging and managed play environment. As outlined in the play sector publication 'Best Play', play provision should aim to '*manage the balance between the need to offer risk and the need to keep children and young people safe from harm*'.

Risk-taking enables children to show resilience, face new challenges, problem solve and communicate with others in a positive way. This directly links back to our Team trinity Code of Take responsibility, I am ambitious, Never give up and I believe in myself.

In addition to standard risk-benefit assessments the school will practice dynamic risk management with children, encouraging them to identify and manage risks in an environment where adults are present to support them.

7. Supervision

The law requires that children in school have supervision but for primary school playtimes there are no stated ratios. During the school day there should be one or more adult's present outdoors. The school recognises OPAL's three models of supervision: Direct, Remote and Ranging. Except for new children in reception, whose skills and orientation in the school environment need to be assessed, the school does not believe direct supervision is possible or beneficial. Supervisors will use ranging and remote supervision models, so that children can quickly find an adult and adults can patrol large sites to gain an awareness of the kinds of play and levels of risk likely to be emerging. Children will be able to experience free-range play so pupils are given permission to use and explore the school grounds or at least part of them without direct supervision.

At Trinity we have agreed to have 3 adults supervising outside. The Play Team will move between direct, remote and ranging supervision throughout playtimes.

Direct

This is where the supervisor(s) will be able to see all areas of play, and be nearby, around a maximum of 20 metres away.

Some play features in these areas, such as playhouses or planting, may offer semi-hidden opportunities. This will be most common in nursery and reception classes.

Remote

This is where a supervisor or supervisors are located at a relatively static location at a good vantage point some distance from an activity, eg supervisor on the playground and activity 20 metres or more away, or supervisor in the middle of a flat school field.

This style is widely used in other countries and its purpose is for an adult to be present to respond rapidly to an accident or serious behaviour incident.

Ranging

This is where the supervisor moves around the play area, usually on a set course/ schedule.

The distance from pupils therefore differs but can be 20 metres or more away. On a large site, supervisors should have zones so that they know which parts of the site they are covering, and they should modify their attention based on the kinds of play and their judgement about areas of highest risk.

For reception pupils (under 5)

No free-range play until the staff have good knowledge of the children and their capabilities. Direct supervision of new EYFS pupils in reception classes in September term one is appropriate as the children do not yet know the school site or staff, and the staff do not yet know the pupils.

For infant-aged pupils (KS1) and junior aged pupils (KS2)

Any of the spaces identified as acceptable for free-range play should be available to them as should most materials. Pupils tend to have a mix of fixed play equipment, while use of natural and fabricated materials is to be encouraged. Some heavier loose materials like rocks, pallets and planks etc, may be challenging for younger pupils as they will be more difficult for them to carry or manipulate. This may change as children become more skilled and competent. Play assemblies, written RBA and dynamic risk assessment practice by staff will be in place to help balance risks and benefits.

8. The adult's role in play

The school will help children maximise the benefits they can gain from play by the provision of trained staff who are informed by and work in accordance with the Playwork Principles. Staff will use and refer to these principles when appropriate interventions are needed, and ultimately will strive for facilitating an environment that nurtures children's self-directed play.

The playworker's core function is to create an environment that will stimulate children's play and maximise their opportunities for a wide range of play experiences. A skilled and experienced playworker is capable of enriching the child's play experience both in terms of the design and resources of the physical environment and in terms of the attitudes and culture fostered within the play setting. Playworkers are a channel of access to new materials and tools and they can act as a stimulus to children to explore and learn. They are also available to participate in the play if invited.

9. Equality and diversity

Through providing a rich play offer meeting every child's needs we will ensure all children, regardless of age, gender, race, disability or other special needs, can develop and thrive, build strong relationships and enjoy school.

10. Environment

We believe that a rich play setting should ensure that all children have access to stimulating environments that are free from unacceptable or unnecessary risks and thereby offer children the opportunity to explore for themselves through their freely chosen play.

We will strive to continually improve the quality and diversity of our school's grounds to enhance play. We will use the document 'Best Play' to guide us on what a quality play environment should contain. www.freeplaynetwork.org.uk/pubs/bestplay.pdf
